Descrizione

PLASTER FRAMES ARE UNIQUE AND HIGH-QUALITY DESIGN DECORATIVE ELEMENTS BECAUSE THEY ARE PRODUCED BY SADI, A LEADING ITALIAN COMPANY IN THE FIELD OF PLASTER DECORATIONS. Each item is produced according to the customer's requirements. The plaster frame is used to outline, to frame or to circumscribe to give personality to a wall, define a space or to give personality to a place without necessarily using colour. Plaster frames allow any environment to be finished off in an original way by choosing from the various ornamental solutions available. From the most classic to the design one for every architectural solution studied – shell frames, placed between wall and ceiling, plaster frames for framing ceilings and walls, plaster frames for boiserie, frames for indirect lighting to allow diffused lighting, classic and style frames, decorated friezes. SADI takes care of the production of plaster frames in its own factories, following every single production step to guarantee the customer a quality product. The use of modern technologies and the expertise of highly qualified workers make SADI's frames unique and exclusive design objects.
